

eCalm[®]

Feed your obsession

The prebiotic feed that improves behaviour and supports wellbeing.

*Healthy skin
and glossy coat*

*Sustains immune
function*

*Prebiotic to
improve gut
health*

Who we are

Natural Vet Nutrition Ltd has science professors and veterinary surgeons working to develop safe and effective remedies based on the powerful beneficial effects of wheat germ extract.

Why we developed eCalm

The team at Natural Vet Nutrition felt there was an opportunity to develop an entirely natural, safe and effective micro-feed prebiotic that would deliver benefits to the horse, improving the rider's experience.

eCalm improves behaviour and supports health and wellbeing by reinforcing the horse's own natural control systems.

Why eCalm is unique

eCalm is made with natural ingredients containing modified wheat germ and acts as a prebiotic.

eCalm helps to maintain immunity, as well as healthy hooves, skin, coat and gut.

eCalm is both safe to use and safe to handle.

eCalm improves the focus, concentration and responsiveness of your horse, delivering a safer and more enjoyable riding experience.

Benefits of a Prebiotic

A prebiotic positively effects the gut flora by promoting the growth of beneficial micro-organisms providing many health benefits.

Here's what our customers say

I have to say a big thank you for my eCalm Prize. My mare has totally changed since starting eCalm.

Olivia Morrissey June

eCalm was genuinely the last resort, after one month on eCalm I was able to exercise him on long reins, lead him out to pasture, and enter his box to feed and groom. All not possible prior to using this product. I can't recommend eCalm enough, we all have a reason for saying 'it's a life saver' in this boy's case eCalm is!

Andrew Read 4 year old gelding, 17.2hh,
Kames Farm

My horse Dibble has been on eCalm since November and what a huge difference I have seen in him. He is a 21yo ex-eventer who is now taking up a career in showing and dressage. Twelve months ago we would be cavorting around the ring in all directions, spinning around on two legs and staying highly strung throughout the day. Since eCalm he has had fantastic results and calms down so much quicker in exciting situations. We had tried different calmers, some took a little edge off and some of the magnesium ones sent him loopy and made him almost unrideable. eCalm has made the world of difference and I am really able to enjoy my horse.

Lizzie G-P

Feeding guidelines:

Use once daily in feed

(a level 25ml scoop delivers 20gm of eCalm)

Weight of horse	Height of horse	Recommended daily quantity
350kg	13hh	15gm
500kg	15hh	20gm
650kg	17hh	25gm

Every batch of eCalm is tested for the wide range of naturally occurring prohibited substances using an ISO/IEC accredited laboratory. eCalm is safe for competition use.
